STEP

13

### ABOUT THE CD-ROM DISCS

Now that you've mastered the basic functionality of your new Olympus Digital Camera, you are ready to begin exploring the possibilities that digital photography brings to your computer.

CD-ROM1  
**OLYMPUS Master software:** Download pictures from the camera, view, organize, retouch, e-mail and print your digital photos and movies and more! This CD also contains the complete software users manual in Adobe Acrobat (PDF) format.

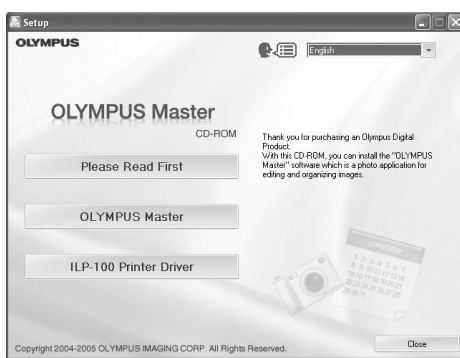

CD-ROM2  
**Advanced Manual:** A complete camera guide in Adobe Acrobat (PDF) format. This manual contains detailed instructions on the camera's features and functions which are not covered in the printed Basic Manual or Quick Start/Quick Reference Guides.

STEP

14

### INSTALLING THE CAMERA SOFTWARE

- Insert the OLYMPUS Master CD-ROM into your computer's CD-ROM drive.
- For Windows: Click the "OLYMPUS Master" button in the "Setup" window.  
For Macintosh: Double-click the "Installer" icon.
- Follow the on-screen instructions. For more details, click "Please Read First".

Please refer to the Quick Reference Guide on the reverse side of this sheet to familiarize yourself with the commonly used features and functions of your new Olympus Digital Camera.

## 1 CAMERA DIAGRAM AND CONTROLS

## 2 SHOOTING MODES

- a. Press ( ).
- b. Press or to select a mode.

### Shooting Mode Descriptions

- P**
- The generic mode for taking pictures. You can also freely adjust functions such as exposure, etc.
- 
- Lets you take impressive portrait shots.
- 
- Lets you take the subject in the foreground as well as the landscape in the background clearly.
- 
- Lets you capture the vivid blues and greens of all the landscape from nearby to far off in the distance.
- 
- Lets you capture those details that would otherwise be cloaked in darkness when taking pictures at night.
- 
- Lets you take a picture of yourself while holding the camera.
- 
- Lets you record movies.

Note: You can change the mode dial when the camera is on or off.

## 3 USING THE ZOOM

This camera features a zoom lens, letting you get closer to the action or capture wide-angle shots.

- Push toward W to zoom out and get more into the picture.
- Pull toward T to zoom in and get closer to the action.

## 4 HOW TO USE THE AUTOFOCUS

- a. While positioning the AF target over the subject, press and hold the shutter button halfway.
- b. The green lamp, which indicates the focus and exposure are locked, remains lit as long as the shutter button is kept depressed halfway.
- c. Press the shutter button completely to take the picture.

## 5 FLASH MODES

This camera features multiple flash modes. You can select the appropriate flash mode to the suit the situation.

- (None)
- AUTO-FLASH - The camera decides if the flash is needed.
  - RED-EYE REDUCTION - Reduces the incidence of red-eye by emitting pre-flashes to shrink pupil size before taking the picture.
  - FILL-IN FLASH - The flash always fires. Suitable for shooting pictures into strong light.
  - FLASH OFF - The flash is turned off. Suitable for when flash photography is not permitted.
- Press the ( ) button repeatedly to toggle through the flash modes.

## 6 IMAGE QUALITY MODES

Your camera is equipped with multiple image quality modes, which determine the quality and image size of the pictures you take. Below is a general description of the commonly used modes. For a detailed description of all quality modes, refer to the Advanced Manual included on the CD-ROM.

Application	Compression		Low compression	High compression
	Image size			
Select according to print size	2592 × 1944		SHQ	HQ
	2592 × 1728			
	1600 × 1200			
For small-sized prints and websites	640 × 480		—	SQ1
			—	SQ2

- a. Press .
- b. Use the arrow pad to select on the monitor.
- c. Select the record mode. Use the arrow pad and to make further settings.

## 7 RECORDING A MOVIE

- a. Set the shooting mode to .
- b. Press the shutter button to start recording (video).
- c. Press the shutter button again to stop.

## 8 HOW TO ERASE ALL PICTURES

**WARNING - PERFORMING THESE STEPS WILL DELETE ALL PICTURES!**

- a. Slide the **POWER** switch to , then press .
- b. Use the arrow pad to select [MODE MENU] on the monitor.
- c. Select the [CARD] tab, and press . Select the [CARD SETUP], and press . Select [ALL ERASE], and press .
- d. Select [YES] and press .

## 9 E-MAILING A PICTURE

Using the OLYMPUS Master software (included), you can share your pictures with others by using the built-in e-mail feature.

After installing OLYMPUS Master, open the program and click "Browse Images". From the "Browse" window, select the picture(s) you want to send and click the "E-mail" tool button.

At this time, you can resize your pictures to make them more manageable for e-mail. This helps you stay within the e-mail capacity limitations set by your or the recipient's e-mail provider.

When finished, click the "Launch Mailer" button at the bottom of the window. Your default e-mail program will open, and the selected picture(s) will automatically be attached to a new message.

## 10 PRINTING A PICTURE

Using the OLYMPUS Master software (included), you can make prints of your pictures using your own photo printer.

After installing OLYMPUS Master, open the program and click the "Print Images" icon on the main menu. You can create many different types of prints such as an index print, photos, albums, or calendars. Simply select the image(s) and add them to one of the many layouts within OLYMPUS Master. For detailed instructions, please refer to the "Help" menu in the software. You can also order prints online using the "Print Online" feature in OLYMPUS Master.

Alternatively, you can print your pictures by connecting your PictBridge\*-compatible camera directly to a PictBridge\*-compatible printer, such as the Olympus P-10 Digital Photo Printer. This permits fast, easy printing without using a computer.

\* For detailed instructions on using PictBridge, please refer to your camera's Advanced Manual included in digital format on the CD-ROM.

## 11 INCLUDED PRINTER

By docking the camera with the included printer, you can print pictures directly without having to use a personal computer. In addition, you can also print pictures by connecting the printer to a PictBridge compatible camera or a personal computer.

### Direct Printing from Digital Camera

Connect the camera in the same pack directly to the printer and print pictures from camera by instructed operation procedure. Cable connection is unnecessary.

### Printing from PictBridge-compatible digital camera

The common standard for the camera and the printer is supported by the software "PictBridge". The camera and the printer both compatible with PictBridge are connected by USB cable to print pictures from camera.

### Printing from PC

The printer and the PC are connected by USB cable to print pictures from PC.
